Technical Skills Lesson

Structure

Range

- **Question policy**
- **Time**
- **Notes**
- **Content / Test**

Objectives

By the end of this lesson you will be able to:

- State the purpose of the technical skills lesson
- Name the elements within the Technical Skills lesson
- State the function of those elements.

Purpose

To ensure that the Key Learning Points are delivered in a logical way with student participation leading to them being able to complete the task.

Skills Objectives

By the end of this lesson you will be able to replace a fuse in a standard three pin plug. The task will be carried out in a simulated workshop environment with the tools and equipment provided. The task must be achieved within 2 minutes, inspecting the plug and casing for any obvious damage. IAW BS 1336(A) and adhering to all relevant H & S regulations.
