Notes:

The statistics are based on averages based on seven years data ending March 2010. These averages are used to avoid small populations and the spurious rates that may result. The use of several years data reduces fluctuations caused by one-off factors and also covers a wider period of the economic cycle which can influence outflow. Data for years 2006/07 and 2007/08 have been excluded ¹ due to issues of data quality and availability surrounding the cessation of legacy systems and the introduction of JPA

Caution should be exercised with regards to interpretation of these statistics. They are constructed from behaviour for Army personnel covering a number of contracts/ engagements.

They form a statistical average for the Army and do not relate to the terms and conditions associated with any particular contract ²

1 Data used is therefore drawn from 2001/02 – 2005/06 and 2008/09 – 2009/10.

2 Nor do they take account of the application of specific measures which will influence careers, for example, redundancy.

Notes:

The statistics are based on averages based on seven years data ending March 2010. These averages are used to avoid small populations and the spurious rates that may result. The use of several years data reduces fluctuations caused by one-off factors and also covers a wider period of the economic cycle which can influence outflow. Data for years 2006/07 and 2007/08 have been excluded ¹ due to issues of data quality and availability surrounding the cessation of legacy systems and the introduction of JPA

Caution should be exercised with regards to interpretation of these statistics. They are constructed from behaviour for Army personnel covering a number of contracts/ engagements.

They form a statistical average for the Army and do not relate to the terms and conditions associated with any particular contract. ²

1 Data used is therefore drawn from 2001/02 – 2005/06 and 2008/09 – 2009/10.

2 Nor do they take account of the application of specific measures which will influence careers, for example, redundancy.
